

Revised June 8, 2018

Pacific Meadows Homeowners,

Per the change to the Pacific Meadows II/III subdivision covenants involving roofing, homeowners can now replace their wood shake or wood shingle roofs with alternative materials which have the same look and appearance as wood shake or wood shingles. To assist homeowners we want to remind homeowners of the requirement criteria:

- 1) They must look like wood shakes or wood shingles in appearance.
- 2) The only acceptable color is “weathered wood” or equivalent.
- 3) Asphalt shingles must carry a 50 year warranty.

To assist homeowners, we are offering a list of pre-approved shingles below. If you desire to utilize a shingle that is not on this list, **IT IS UP TO YOU** to submit a request for approval to the homeowner’s association **PRIOR** to replacing your roof. If you select one of the shingles on this list you **DO NOT** have to gain approval prior to installation.
